

ASIE report - Online meeting 15th September 2020

Maintaining existing local actions under ‘pandemic times’:

- **Testimonials** during isolation/staying at home (March-June 2020)
- **Collection of MEME** with both topics: COVID 19 and GB (continuous)
- **Photovoice:** What do I see from my window? (March-June 2020)

New actions (July-August 2020):

- **Virtual journey:** two virtual journeys have been produced during July-August. The journeys can be considered prequels for the real journeys as they are both 1 day trips in the Iasi surroundings, in places the authors have never been before. The virtual journeys have been documented using internet information from various sources. They can be found in the shared GD.
- **The everyday journey: From home to work (by walk, by bike, by local transport, by car)** – the story of this everyday ‘journey’ which bridges the house with the working place, personal life with professional life. Reflections on the way home or on the way to work may bring valuable testimonials for the importance of this daily journey.

Side action: **Making the journey using the mindfulness technique** and notice the changes

- **Real local journeys:**
In July – **The Dobrovat trip** (documenting the trail, verifying the information within the virtual journey, experiencing outdoor learning)
26th August – **The Poiana cu Schit trip** (documenting the trail, verifying the information within the virtual journey, experiencing outdoor learning)

Local activities with joint participation of ASIE members and volunteers

- **Cultural events in open spaces** (such as Botanical Garden) – July, August and September 2020
- **Local meetings and actions of Codrii Iasilor group** – July, August and September 2020: online contest of old pictures, greening activities, debates, local walks.

- **Street Delivery Local Event 2020 edition – 11-13 September 2020:** guided tours in Iasi city centre, plants exchange event, movement in nature, Iasi – city of community urban gardens (debate), Re-Solutions for the gray walls of the city (online debate).

Other

- Research on new existing trails in Iasi surroundings to organise virtual and real journeys
- Contribution to the local documentation on protected flora and fauna around Iasi
- Maintaining communication with local people interested in GB and in local activities in nature and preserving local natural habitats

Observations/Suggestions:

Due to the start of the new school year in very restrictive and controlled manner, our everyday morning schedule is requiring full assistance of students. We are also required to reduce the time spent within the school premises, outside the working hours. Therefore, the 11.00 a.m. (EET) time for the online meetings – which was used during lockdown and during summer – cannot be met by ASIE. An afternoon time is much more convenient for us.

The resolution of the Romanian pictures used for GB site is very low. Please take into consideration a higher quality of the materials used in the website for which we can provide the necessary photos & information. We could send them in a required format in order to increase the quality on the website.

As a suggestion, I propose using Doodle (<https://doodle.com/en/>) a free online meeting schedule tool that might help us establish the right time for our next meeting. It is very helpful, just click on the + on the right upper corner and create a proposal in just 4 steps.
