Please list the 3 most important Green Bridges actions taken by your group between May & October. Please supply evidence of the action (eg pictures on the web site, formal report of a meeting with other agencies)			
			Response Percent
			Response Total
1	Open-Ended Question		100.00%
	1	02/11/2020 16:27 PM ID: 151527306	1. The Barnova – Poiana cu Schit – Poiana cu Cetate Green Way implementation&mapping 2. Dobrovat Green Way implementation&mapping 3. Research&development of creative indoor activities under lockdown -pictures&movies& collages& written materials uploaded on Google Drive - Short Written Reports for March-Nov created and uploaded on GD - Synthetic presentation report created, presented and uploaded on GD after Thursday, November 5th
	2	03/11/2020 17:13 PM ID: 151616906	1) identifying routes and creating videos with the drone with subsequent power point presentation 2) spreading of the project and visit to the valley of mills with tourists 3) constitution of a civic committee of Spilinga
	3	04/11/2020 05:27 AM ID: 151643411	1) Active participation in the GB project activities 2) The Green Bridges course 'Forestmind and Forest Yoga – part 1'- in the Ellivuori -area and Devil's mountain. https://opistopalvelut.fi/sastamala/course.php?l=fi&t=97 3) New pedagogical approach and as well as new methodology taken into practise in the Green Bridges project context. Ie. yoga and Finnish "metsämieli - forestmind –method. http://metsamieli.fi/Forestmind-fi/ The Forest Mind course is a practical example of an educational activity and it has been shared transnationally within the consortium, as well as locally. The pilot activities have added to new informal learning opportunities within the college. The new methodologies of Forestmind and Forest Yoga activities created a genuine bridge between people and their local natural environment. https://greenbridgesproject.org/finland/meeting-the-trees/
	4	04/11/2020 08:21 AM ID: 151646567	Internal meetings devoted to the development of trails. There was hope for a group meetings and walking tours but pandemic hit again and it was impossible. Exploration of Poznań outskirts in a search for a perfect place for a Bridge. Desk research on meteorites in Poznań and the woodtherapy.
	5	04/11/2020 15:45 PM ID: 151681208	1. Testing the route of the Oak Grove (https://drive.google.com/drive/u/2/folders/1rEi5_G0ZqLrYEtnLFkjXilu-nYaCFEO2 Pages 10-22) 2. Educational activities - workshops with Giedrazole (https://greenbridgesproject.files.wordpress.com/2020/08/educational-activities_It.pdf Pages 1-6) 3. Movie nights (https://drive.google.com/drive/u/2/folders/1rEi5_G0ZqLrYEtnLFkjXilu-nYaCFEO2 Pages 6-8)
	6	09/11/2020 03:18 AM ID: 151969460	Creating work programmes Organising & managing the partnership meetings organising a project weekend activity in October

2. How did the 3 actions relate to/contribute to the Green Bridges "7 Tangible Results"?			
			Response Percent
			Response Total
1	Open-Ended Question		100.00%
	1	02/11/2020 16:27 PM ID: 151527306	All 3 actions are directly related to the tangible actions. The chosen Green Ways link lasi city with the villages near lasi, thus bridging urban community with rural community. The research and preparation of the Green Ways are part of the educational activities targeted by the project. Participants have developed various skills from preparation until real implementation which shall be useful for the development of the next trail.
	2	03/11/2020 17:13 PM ID: 151616906	At the end of the lockdown the members icre have inspected the routes already identified at the beginning of the project in order to make them accessible to the community, to tourists and we hope soon to our partner. Many of our partners working in the field of tourism and being very busy during these months have thought to involve in the project people coming from different part of Italy and than they have collected their impressions on the valley of the mills. Such us: "" The visit to the valley of the mills has represented an involving experience both from the cognitive point of view that educational that emotional. You made us feel to be a part of nature and not something outside of it"" (Luciana, coming from Treviso). "" You made us live a beautiful experience. It was an opportunity to discover the natural wonders that are hidden in this territory. Don't stop to make these beauties known"" (Giovanni, coming from Bologna) We can notice the correlation between the three actions and the contribution to the 7 results of Green Bridges.
	3	04/11/2020 05:27 AM ID: 151643411	In addition to the tangible results of.... 1) The Green Bridges route around the centre of Sastamala; creation of publicly accessible Green Way map accompanied with interactive links to the natural environment. https://bit.ly/2HUKA4M 2) Picture journal created in the COVID-19 –situation. https://greenbridgesproject.org/pandemic-times-reflections/ 3) Journey to distance work place; on the 3rd of April 2020 Sastamala Community College was celebrating a national "Walk to work"-day. The College shared the journeys of its staff's "work trips" on the social media platforms of Facebook and Instagram. ... 4) the Green Bridges Forestmind course is a logical continuance to the activities plan.
	4	04/11/2020 08:21 AM ID: 151646567	All actions concentrate on the development of the results.
	5	04/11/2020 15:45 PM ID: 151681208	1. Testing the route of the Oak Grove - we have created a the prototype of possible route and collected information about it while testing it (1st group, The Green Way). Testing have shown that route is not perfect yet and we need to improve some parts of it. Also, we have collected stories about old buildings and places that are in this route, also have learnt new thing about the Oak Grove and urban, cultural and botanical heritage of it (3rd group, The Personal). 2. Workshops with Giedrazole were creative educational activities. During them participants have learnt meaningful and creative interaction with the nature (2nd group Activities & Standarts+ 3rd group, The Personal). 3. Movie nights - for. ex., Adic Forest, was an educational activity, that helped to raise awareness about Lithuanian's nature. (2nd group Activities & Standarts)
	6	09/11/2020 03:18 AM ID: 151969460	The first 2 were encouraging the partnership to develop work The third related to trails but not other aspects

What were the results and impact of those 3 actions			
			Response Percent
			Response Total
1	Open-Ended Question		100.00%
	1	02/11/2020 16:27 PM ID: 151527306	-Due to implementation of 2 Green Ways, 1 route was chosen to be part of O1/2/3 -many collections of photos, images -new community partners engaged in environmental protection and social enterprise -wide network of volunteers -continuing dissemination of the project
	2	03/11/2020 17:13 PM ID: 151616906	The results obtained from these actions up to now have been: the use of the paths by the community; environmental education through a workshop of learning and shared relationships; information and awareness raising on the ecological, cultural and historical aspects of the route. The most important impact that we had, was in the tourist field because we have organized guided visits allowing the knowledge of the territory to the community.
	3	04/11/2020 05:27 AM ID: 151643411	All the tangible results produced during the life span of the project so far have raised awareness in such areas as: <ul style="list-style-type: none"> • Environment and climate change • Health and wellbeing • Creativity and culture Yoga is very popular in Finland. However, the Green Bridges course type of activity is innovative, it is a new type of approach to the new skills developed and link to the local nature resource.
	4	04/11/2020 08:21 AM ID: 151646567	We finally made some tours on bikes, we have found some option for trails in Poznań which are a green bridges.
	5	04/11/2020 15:45 PM ID: 151681208	1. Library's volunteers have join the route's testing, so we involved new contributors to this project, as they gave valuable feedback about the Oak Grove route. Tasks like creating a possible route, its map, testing it, asking for feedback about it gave us pragmatic understanding about path/route creation. We have gained new skills on how to create a small scale journeys in the nature. 2. Giedrazole's workshops were an example of best practice educational/creative activity, that connects people with the nature and one another, as well as advocate the project idea. 3. Movie nights were the activity, that gathered the many people. In our practice this activity does not require a lot of hours to organize, but give one of the biggest quantitative result that can help to communicate about the project and pay attention to its goals.
	6	09/11/2020 03:18 AM ID: 151969460	The partners responded in a variety of ways - some more focused on the environmental purposes than others. The lack of physical meetings was a considerable disadvantage

What do you consider has been the most significant contribution your group has made to the Green Bridges Partnership during the first year of the project?			
			Response Percent
			Response Total
1	Open-Ended Question		100.00%
	1	02/11/2020 16:27 PM ID: 151527306	- suggesting types of indoor activities due to the lack of outdoor activities: all partners have used the suggested type of activities to continue developing the project actions
	2	03/11/2020 17:13 PM ID: 151616906	Due to the corona virus and due to the lockdown we focalized our work on the feelings that the covid provoked. We asked experts and not to write articles in which they reported their feelings and fears. We reported them on the green bridges web site. We gave voice to the kids coming from primary school and with their drawing they gave hope in a sad moment.
	3	04/11/2020 05:27 AM ID: 151643411	Providing new, practical and transparent informal learning opportunities by using new methodologies & imaginative use of 'learning in nature' learning processes, and sharing them with the partnership.
	4	04/11/2020 08:21 AM ID: 151646567	Exploration of the subject of green bridges which came to a conclusion of some green trails - all this was new to a local group, we really made a discovery.
	5	04/11/2020 15:45 PM ID: 151681208	The most important task was to create a prototype route of an Oak Grove. It was a complex task, that required a group of people with different skills.
	6	09/11/2020 03:18 AM ID: 151969460	Coordinating during the pandemic. A unique experience and very different to previous 17 years of experience.

4. Dissemination Part Two: Please provide information to the 3 questions below What do you consider has been the impact ('result') of the dissemination described in Part One? During the past year: Has your group expanded/gained new members/developed a new network? Please give evidence of the impact (eg specific actions taken by new members)

			Response Percent	Response Total
1	Open-Ended Question		100.00%	6
1	02/11/2020 16:27 PM ID: 151527306	<ul style="list-style-type: none"> What do you consider has been the impact ('result') of the dissemination described in Part One? 		

		<p>-raising the community's awareness on GB project -increase the number of volunteers who help ASIE to develop better&more effectively the project's actions. -better support &involvement in online/local activities</p> <p>• During the past year: Has your group expanded/gained new members/developed a new network? Yes, ASIE gained many new partners from the project's area, such as Codrii Iasilor or Greenpeace Romania, bikers who are regularly using the already created Green Ways around Iasi</p> <p>• Please give evidence of the impact (eg specific actions taken by new members) -All the activities listed under "Covidian experience" wouldn't have existed if all these volunteers wouldn't have participated. - Due to their perseverance and commitment, Codrii Iasilor group has initiated a campaign to save the secular trees around Iasi and 14.000 people have already signed their online petition (https://cutt.ly/HgIVW43)</p>				
2	03/11/2020 17:13 PM ID: 151616906	<p>This spread has encouraged the community to listen and look at nature from a different point of view, that is through the 5 senses to fully catch every aspect. From the beginning icre has involved young people in this project by raising awareness on this issue and brought them closer to the world of European projects. Some have collaborated on the making of videos with the drone, others helped to collect material such as photos, articles and testimonials during lockdown, others have accompanied the tourists in the valley of the mills and last but not least Marila who is actively collaborating with us.</p>				
3	04/11/2020 05:27 AM ID: 151643411	<p>Please see all the above.</p> <p>Result of dissemination: higher visibility, awareness, transparancy, new learners, providing information about the Erasmus+ programme New members yes: a new member of teaching staff (instructor) and new learners</p>				
4	04/11/2020 08:21 AM ID: 151646567	<p>To spread the word about the project, its existence, to promote the project and its idea. To find some people who want to participate in the project activities. It was not possible to find new members during past year, it is easy to follow the project requirements and manage the project for Foundation managers but it was not easy to work with learners during pandemic. It was impossible. The impact is that the project trigger our attention to the Green part of where we live.</p>				
5	04/11/2020 15:45 PM ID: 151681208	<p>Events/activities were organized for different age groups, so message about the project has been widely spread through different audiences. Also, we have made new partnerships during past year, that as well announced the project's ideas. New partners are:</p> <ul style="list-style-type: none">- Social initiative ""Urbanbee.It"" - made presentation about urban beekeeping, presented honey collected on the city's rooftops;- Association of Applied Anthropology ""Anthropos"" - carried out educational activities and discussions about food waste, its effect to the nature;- Café ""Chaika"" - provided vegan and eco friendly snacks for event;- Artist Giedrazole - carried out educational/creative workshops (sculpture of herbs creation);- Producer Dovydas Korba - presented a movie and participated in discussion about ecological issues.				
6	09/11/2020 03:18 AM ID: 151969460	<p>Very limited impact due to suspension of activity</p> <p>There are 6 new members engaged in the work - others, from various local communities were becoming engaged but these links and engagements are in suspension.</p> <p>New members have engaged in creative work (ceramics. art, music) & organisationally (chairing virtual meetings, contributing to planning, leading a sub group)</p>

2. Covid 19 Impact

5. What, locally, has been the greatest impact of the pandemic on your organisation & its Green Bridges action plans?				Response Percent	Response Total
1	Open-Ended Question			100.00%	6
	1	02/11/2020 16:27 PM ID: 151527306	It started in March when we were supposed to meet the other partners at the 2nd international meeting in UK. The greatest impact of the pandemic has ceased for more than 3 months all the outdoor activities of ASIE. As GB is mainly based on outdoor activities, ASIE had to rethink the initially created activities.		
	2	03/11/2020 17:13 PM ID: 151616906	The closure due to the pandemic was total, for about three months we were forced to stay in the house, we went out just to go to the supermarket. Because of all this the practical activities were interrupted, so we communicated through the WEB. The biggest impact of the pandemic on the project was to ask professional figures to express an opinion on the relationship between man and nature at the time of Covid-19.		
	3	04/11/2020 05:27 AM ID: 151643411	Taking courses and other activities outdoors, into the nature (into the wild).		
	4	04/11/2020 08:21 AM ID: 151646567	We cannot meet and people's focus is mainly on pandemic with different intensity. Pandemic has taken our thoughts and people are afraid again.		
	5	04/11/2020 15:45 PM ID: 151681208	Period March 16th - June 16th was national quarantine, so we couldn't execute any physical activity during this period. The pandemic has also impacted the process of route's creation - there were recommendations not to go outside and avoid even places like parks in Lithuania, so we couldn't plan the route by walking in the Oak Grove. It led to bigger issues after the quarantine: after testing the route we saw the the it should have some changes. Planning all in physical place would have helped to avoid these issues.		
	6	09/11/2020 03:18 AM ID: 151969460	Suspension of almost all planned activities		
				answered	6
				skipped	0

6. What does your organisation consider has been the greatest impact of the pandemic on the Green Bridges project & partnership.			
			Response Percent
			Response Total
1	Open-Ended Question		100.00%
	1	02/11/2020 16:27 PM ID: 151527306	The greatest impact of the pandemic hit GB project very hard. Measures regarding lockdown differed a lot from one country to another (or not, as for Finland; for a very long time they were the only ones who had the opportunity to implement the project's objectives, starting from the Green Way and many other outdoor activities). But if we see the full part of the glass, we have developed interesting indoor activities also related to the project's themes.
	2	03/11/2020 17:13 PM ID: 151616906	The professional figures expressed particular opinions and moods that led to reflection on the situation, not only to ICRE members but also to the partnership. Despite the tragic reality that Italy was experiencing such figures have managed to convey strong and tangible emotions.
	3	04/11/2020 05:27 AM ID: 151643411	The greatest positive impact? The online communication between partners has become truly efficient.
	4	04/11/2020 08:21 AM ID: 151646567	Lack of meetings has made a project very difficult.
	5	04/11/2020 15:45 PM ID: 151681208	The project's management have become more uncertain, but on the other hand, the communication between the project partners have intensified, as we have virtual meetings once a month. Also, we now know what are other partners country's pandemic situation, so we can understand how much they can contribute to the project.
	6	09/11/2020 03:18 AM ID: 151969460	The loss of the LTTA meetings, which were to be formative events in which the principles and purposes of the project were developed, has resulted in the partnership lacking a common focus. Partners have continued with aspects of work created at the outset of the project - but these efforts are not coordinated into the overall original purposes. There is a loss of coherence & connection.

7. What action has your organisation taken to develop the Green Bridges project & partnership during the pandemic? If there has been little or no change to your plans, then please explain.

			Response Percent	Response Total
1	Open-Ended Question		100.00%	6
	1	02/11/2020 16:27 PM ID: 151527306	Not little, but huge change of plans regarding the remote activities to replace the impossibility to perform the outdoor activities. But all was a blessing in disguise as we had the possibility to meet wonderful people (online) who were interested in the GB project.	
	2	03/11/2020 17:13 PM ID: 151616906	The pandemic has upset our idea of the project, based on the five senses, therefore, since we were unable to develop what we had set ourselves, we had to take other different actions that we expressed in the previous question.	
	3	04/11/2020 05:27 AM ID: 151643411	We have had only very little - or none - changes to the plan of carrying out the project deliverables. We have carried out work almost as usual in the existing circumstances (except for the obvious travel restrictions) and honoring what has been agreed between partners and carried out tasks given to us by the project coordinator.	
	4	04/11/2020 08:21 AM ID: 151646567	meet online and with very limited group of our staff	
	5	04/11/2020 15:45 PM ID: 151681208	One part of activities was organized online (ex., Plant's book presentation, project contributor meetings), another part of them were postponed (ex., Movie nights + discussions) and organized after the quarantine (post June 16th) because of their format.	
	6	09/11/2020 03:18 AM ID: 151969460	<p>The original plans, created during the first 4 months of the partnership are almost 'untouched'. One weekend of related activity in October has been achieved.</p> <p>In general, as coordinator the work involved in attempts to hold together & develop the partnership have been nearly continuous - and it is questionable if that effort has been of any long-term value.</p>

			skipped	0

8. Impact of the Pandemic: Please provide any extra information relating to the impact of Covid 19 on any aspect of your local work with Green Bridges eg: travel restrictions We all have them - even if we can travel... 'where (to which partners) can we go'? general disruption, work re-organisation, Covid illness, family issues, community difficulties. All these issues have applied to the UK partner - & Wales is presently completely shut-down with a 'fire-break' action The Interim Report needs as much personal and community information as possible. Statements in the report will be non-specific (unless agreed)

			Response Percent	Response Total
1	Open-Ended Question		100.00%	6
	1	02/11/2020 16:27 PM ID: 151527306	https://asieong.wordpress.com/2020/08/03/how-asie-is-adapting-for-covid-19/	
	2	03/11/2020 17:13 PM ID: 151616906	The lockdown involved a number of restrictions including travel restrictions, in fact in March we were ready to leave for England but they cancelled our flights. We must consider that travel is the most important activity of the project. The pandemic forced us to reorganize all the work based on virtual meetings (we would have preferred a real hug). In the summer we thought that the COVID-19 was disappeared, but it has returned more contagious than before in fact our government will shortly make a new decree to close Calabria as our health care system is not able to bear a large number of Covid patients in hospitals.	
	3	04/11/2020 05:27 AM ID: 151643411	Having said that we at SCC have carried out work almost as usual in the existing circumstances (except for the obvious travel restrictions), I would like to add that the missing LTTAs are a huge loss for the project. This project is very hands on, very practical and based on human interaction and particularly interaction between nature and people. In this light, sitting at the computer with limited means of communication does by no means add to the European added value as it was planned in the project plan.	
	4	04/11/2020 08:21 AM ID: 151646567	It is again a difficult period, even more difficult that a first vague of pandemic but more people are ill and more people recover. We are close to a total lockdown in Poland.	
	5	04/11/2020 15:45 PM ID: 151681208	<p>2020:</p> <p>March 16th - June 16th: 1st national quarantine, restrictions for work, travel, events, etc.</p> <p>June 16th - October 8th: normal life with some restrictions (face masks for events and closed areas, social distancing, travel restrictions for some of the counties) - number of cases starting to grow;</p> <p>October 8th - first covid-19 case in the Library, 50%-100% of work must be done from home, almost all events in the library must be converted to online presence.</p> <p>October 28th - local quarantine (Kaunas was in the red ""most dangerous"" area) - facemasks in open and closed spaces, more restrictions for physical events (our library still require to organize only online events) and 100% work from home, restrictions for travelling to almost every European country. 1000 cases a day is the new normal (compared to 50-100 cases during first nat. quarantine).</p> <p>November 7th - 2nd national quarantine. Working from home, no events, gatherings, etc. Restrictions for travelling to almost every European country. Only groups of 5 people from one family can go outside. At the moment, it is planning to last for 3 weeks.</p> <p>We are planning to work similarly to 1st national quarantine period.</p>	
	6	09/11/2020 03:18 AM ID: 151969460	<p>Members of Pathways ID have been impacted in a range of ways - extra isolation, family disruption & illness, home based working.</p> <p>Fortunately no-one has been seriously ill & generally within the group, there has been a positive attitude.</p> <p>Only one group meeting (in September) has been achieved since March 16th. Attendance of 10.</p>

9. Future: Please provide comments, ideas & suggestions for the development of the project for example, ideas about the development of the project during the year &/or for a project extension a partnership meeting programme (if that becomes possible)

			Response Percent	Response Total
1	Open-Ended Question		100.00%	6
	1	02/11/2020 16:27 PM ID: 151527306	ASIE would like to suggest for the partners who have missed hosting LTTA1 and LTTA2 to provide an online workshop to present online part of the activities already established in their agenda. It is a backup plan for the other TNMs in case of another lockdown. Now, at the beginning of November, Romania has more than 4000 positive confirmed cases a day, so a future emergency state & other lockdown specific restrictions are foreseen.	
	2	03/11/2020 17:13 PM ID: 151616906	ICRE has decided to publish the presentation made to the partnership, on the official website of the association, highlighting the focal points expressed in order to share them with the community and ask them to express the feelings they arouse. This is our idea of project development, since soon there will be a new lockdown and the only way to develop the project and meet us is the web.	
	3	04/11/2020 05:27 AM ID: 151643411	Referring to the previous answer: this project would deserve 'a new run' built on the work already done at the project. Should this be extension or some other type of solution offered by the UK NA, this is very difficult to comment.	
	4	04/11/2020 08:21 AM ID: 151646567	We need a real meeting with our local teams.	
	5	04/11/2020 15:45 PM ID: 151681208	<p>The idea of sub groups of 2 country partners is welcome. In our opinion, we are in the good direction with the project and can successfully continue working on 7 tangible results and its outputs, but meetings smaller groups will be more affective. So for now, we can focus on outputs.</p> <p>Sadly, we are not thinking about possible physical meetings with other partners and travelling in general.</p>	
	6	09/11/2020 03:18 AM ID: 151969460	<p>It is difficult to consider, at this point, how physical meeting may occur - and if they do, given the dysfunction of the present, to know what value they might have in the development of the project as they would be occurring after the work has been largely completed.</p> <p>Plans are being considered for partners working together in sub-groups</p>

10. Any other comments about the Green Bridges project & its development.					
				Response Percent	Response Total
1	Open-Ended Question			100.00%	5
	1	02/11/2020 16:27 PM ID: 151527306	No.		
	2	03/11/2020 17:13 PM ID: 151616906	The ICRE members decided to meet shortly in order to extract new ideas for the developing of the Green Bridges project.		
	3	04/11/2020 05:27 AM ID: 151643411	--		
	4	04/11/2020 08:21 AM ID: 151646567	no comments		
	5	04/11/2020 15:45 PM ID: 151681208	Maybe, during the new pandemic waves we can think about the project communication and how to spread the message about the project more widely.
