

A Dip in Nature

Nature is : BALANCE...

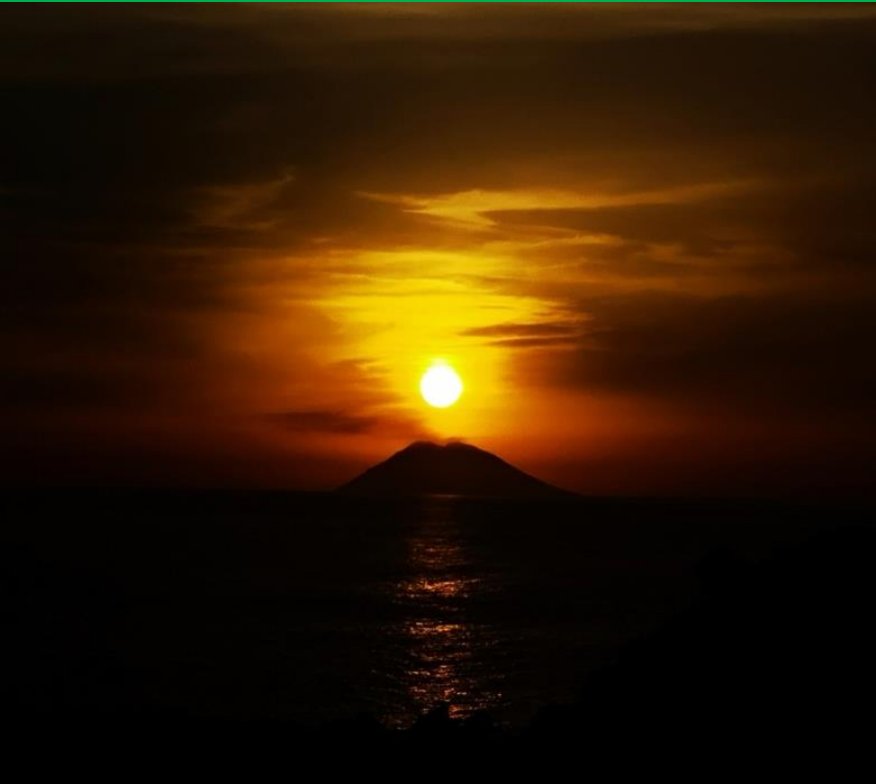

*Have you ever tried
To look at the sea
Like you were a fisherman,
silent on the shore,
To follow with your eyes
a trail that traces the red horizon
discovering that it unites the East and the
West.*

and ARMONY ...

Have you ever tried: to look at the sky, to lie on a field caressing a flower, to follow with your eyes tops, leaves and auroras that pop up again, between the blue and the sun.

...Sadly, when an element changes, by the hand of human, this balance is interrupted.

“Sorry Earth for the presumption of every human being that is living and that lived.

Sorry, Earth, for destroying your fields and oceans.

Sorry Earth for killing millions of animals.

Sorry Earth for not considering you as a son must do towards a mother. With love and gratitude.”

The humanity stops

“Does the Earth has put in “field” its resources to try to restore a balance now compromised for too long?”

“The greatest cause of stress are the fear of being contaminated , the fear of contaminating the others, especially the family, the boredom and the limitation of freedom”

“ I didn’t think I could be afraid crossing something or someone. “

“You have the same name of a supermarket chain, or like the one of a discount card, but at the end you don’t make any discount. “

and nature takes back its spaces

A deep plunge into nature

All things are connected.

For your children to respect the earth, tell them that the earth is rich in the lives of our people.

Teach your children that the earth is our mother.

Whatever happens to the earth, it also happens to our children of the earth.

The earth does not belong to man, it is man who belongs to the earth.

Man did not weave the net of life, he is only a thread. Whatever he does to the net, he does to himself
