

Creating a leaflet:

Low cost example of a draft leaflet produced by University students in Iasi participating in a social and personal development programme in 1999

The task was to research & publish & present to the local authority, a heritage related walking trail through the city.

The draft leaflet was created with one piece of A3 paper (centrally folded), text created in text boxes (Word 97) & a sketch outlining the potential route.

A more 'professional-looking' colour version (by students) was produced for formal presentation
