

# **Report of Green Bridges Activity**

## **Partner Country Code:**

Name:

### **Tangible Outputs: Final report**

Please provide a detailed response in the sections below.

Each partner is receiving a copy of this survey.

The responses are automatically recorded.

Each partner has a dedicated Google Drive Folder (information sent separately)

Please place reports & required evidential material in the partner specific folder.

The information provided will be used/adapted & placed on the web site.

- The web site will be a major element in our final report.
  - It will be providing essential evidence for the final assessment by UK NA

This approach

- has been successful used for the Green Bridges Interim Reports
- received positive comments & particular interest from assessors in the final reporting process for the 2016 – 18 Arboreal Futures project.

## Tangible Output 1

Explanatory Note: All partners had created 'Green Ways'.

These were published during 2020.

For most partners original ideas have developed and changed.

Where the route remains the same as in 2020, then **only** a reference to the existing web information is required.

Where major changes have occurred (as has occurred in UK)

Please place information in the Partner specific shared Google Folder (link address sent separately)

Tangible Output	Requirement	Details <i>If the map is already on the partnership web site please provide reference &amp; link</i>
TO 1: <i>A publicly accessible 'Green Way'</i>	A basic map showing context  Brief, summary description	

## Tangible Output 2

This information can be combined with O3 & be presented as a web based leaflet: usable from the web & capable of being printed as a 'hand-out'

Tangible Output	Requirement	Details
TO 2: <i>A publicly usable map of the route</i>	Map to have guidance for users: distances, hazards, accessibility etc (If combined with O3 descriptions of significant points of relevance & interest on the route)	<i>If a printable/downloadable map with all requirements already exists on the web site, then a web reference to it is all that is required.</i>

### Tangible Output 3

This can be combined with O2 & be presented as a leaflet: usable from the web & printed

Tangible Output	Requirement	Details
TO 3: <i>Images &amp; information Of communities, facilities, social, cultural, natural interest related to the route of the Green Way.</i>	Information that assists develop the relationship between visitor/participant & local environment	

## Tangible Output 4

This Output is a single partnership production to which all partners made a contribution in July 2021

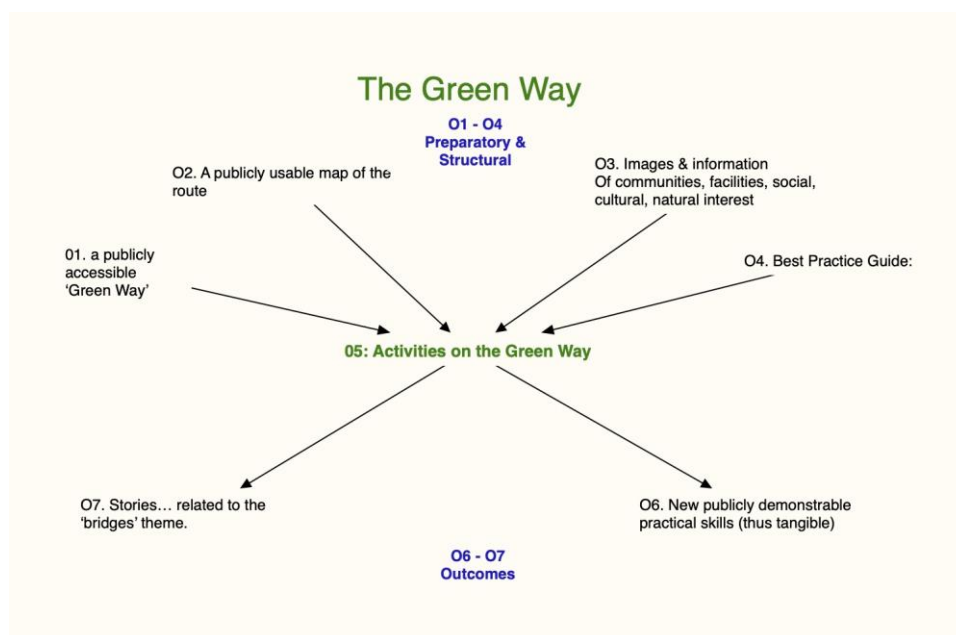

Tangible Output	Requirement	Details
TO 4: <i>Best Practice Guide: covering education process, management practise, health &amp; safety, safeguarding &amp; data protection.</i>	Some aspects of the Guide will be required in TO 5	NA

## Tangible Output 5

### Creative environmentally related educational Activities on/associated with the Green Way

Activities on the Green Way are at the 'heart' of the Green Bridge Project

Outputs 1 – 4 lead to this central element.

There is a traditional statement British aphorism which states:

**“The ‘proof’** *(test of quality)* **of the pudding is in the eating”** *(of the pudding)*

The test of the quality of the Green Bridges project,

its products & its partners,

can be judged by

the quality of the activities occurring on the Green Way.

## Tangible Output 5

### Part One:

#### Summary of completed activities

List (with dates) the activities achieved with groups or individuals on the Green Way in 2021.

- Activities completed
  - Please provide evidence in form of reports, photographs, videos
  - All evidential material to be placed in the partner specific Google Drive Folder
- future actions.

(Work during 2020, already reported, was preparatory to action in 2021)

Tangible Output	Requirement	Details
TO 5: <i>Creative environmentally related educational Activities on/associated with the Green Way</i>  Part One Summary of completed activities	Summary of completed activities & future intentions	

## Tangible Output 5

### Part Two

#### Preparatory Work

**TO 5 is the central element of the whole project.**

Activities using the Green Way need to be

- Purpose-led
- Ensure that all those participating are properly informed regarding the reasons & purposes of the activity
- Have an activity that is fully compliant with the protocols described in O4 (H & S etc)

Tangible Output	Requirement	Details
<b>TO 5:</b> <i>Creative environmentally related educational Activities on/associated with the Green Way</i>  <b>Part Two: Preparatory Work</b>	Preparatory work: Please provide:  1. Purpose of Activity. Information provided to participants  2. Risk Assessment details & procedures	

## Tangible Output 5

### Part Three

#### The Creative Activities

- the most important element of the project:
  - using the Green Way as a metaphorical bridge along which clients/participants are able to engage creatively with the local environment & the Natural World

The activity is organised by the local partner

- with groups & individuals who have not been part of the planning process.

The description of the activity should be based on photographic & video material & reports.

Tangible Output	Requirement	Details A summary of material deposited in the Google Drive folder
<b>TO 5:</b> <i>Creative environmentally related educational Activities on/associated with the Green Way</i>  <b>Part Three:</b> <b>The Activities</b>	Please provide detailed description of the activity with photographic /video evidence.	<i>Please use the designated Google Drive shared folder in which to deposit the necessary material</i>

## Tangible Output 5

### Part Four

#### Assessment & Evaluation

The Green Bridges project was designed to be an action that established an environmentally valuable route & activities that will continue beyond the life of the project.

Assessment & Evaluation are the processes that

- improve & enhance the work of the Green Bridges project
- make the route and associated activities effective & relevant to the locality & local communities

Tangible Output	Requirement	Details
<p>TO 5: <i>Creative environment ally related educational Activities on/associated with the Green Way</i></p> <p>Part Four: Assessment &amp; Evaluation</p>	<p>Describe the assessment processes</p> <p>* used with clients and participants</p> <p>* the project management group responsible for the activity</p> <p>What were the conclusions?</p> <p>What adjustments &amp; improvements have been made following assessment?</p>	

•

## Tangible Output 6

### Practical Skills

The pandemic fractured the original intention of creating opportunities for learners to gain skills. The social isolation & severe restrictions have prevented this.

The pandemic has created a range of situations in which other & un-anticipated new skills may have been ('should have been') acquired.

One obvious example is the developed use of IT (Zoom etc)

There are probably many 'soft skills' that have also been enhanced during the whole process of the project

Tangible Output	Requirement	Details
TO 6: <i>Practical skills</i>	Please provide details of new hard or soft skills that have been acquired &/or enhanced/developed	

## Tangible Output 7

### Stories

The pandemic has altered the original intention.

The partnership agreed to focus on stories of local environmentalists

Tangible Output	Requirement	<b>Details</b> <i>A brief outline is required. The full interview should be placed in the partner 'Completed Work' Google Drive file.</i>
<b>TO 7:</b> <i>Stories in multi-media collected during the project about or directly related to the 'bridges' theme.</i>	An interview with a significant local environmentalist (using the format & questions created by ICRE).  Under 'Details' a brief outline is required. The full interview should be placed in the partner 'Completed Work' Google Drive file.
